

Offline Maps Instructions

(iPhone, iPad, Android phone, Blackberry & Kindle):

1. [Download](#) the Maps.me App on your mobile device.
2. Open the Maps.me App and download the map of the entire country. To download, go to the main menu, click on Download Maps, and search for the country (e.g. Cuba).
3. Go to the [digital map](#) to download the KML file.
4. Click on the 3 dots icon at the top right of the legend, next to the title.
5. Click “Export to KML/KMZ”.
6. In the next window that pops up, click “Export to a .KML file”, and then click download.
7. To open the KML file on your device - swipe right through the row of Apps until you see the Maps.me icon. Click on the Maps.me icon.
8. Your custom map will now upload to your Bookmarks in the Maps.me App.
9. To view your map, click on the Bookmarks icon (second icon from the right at the bottom), click on your map, and then click on any point of interest.
10. To utilize offline navigation during your trip, make sure the GPS on your mobile device is turned on. This will allow you to see your blue location dot on the map.

See more [instructions](#) on how to use Maps.me to your full advantage.
